

Hayden Case's CV

Hayden Case

Software Engineer, AI Tester, Mod Developer

case.hayden04@gmail.com | [Download PDF](#)

Specialized in

Developing websites and creating various applications for public use

Education

Bachelor of Computer Engineering in Software Development | January 2026 - April 2028

Brigham Young University - Idaho

Rexburg, Idaho

Associate of Applied Science in Software Development | September 2020 - December 2022

Metropolitan Community College

Lee's Summit, Missouri

Experience

AI Tester | Handshake AI

Remote

October 2025 - Present

- Performed tasks focused on improving AI behavior to better emulate human interaction and responses.
- Designed and refined prompts to enable AI systems to generate realistic and natural image outputs.
- Developed an understanding of practical and ethical applications of AI in modern society.

Missionary | The Church of Jesus Christ of Latter-day Saints

Nagoya, Japan

April 2023 - September 2025

- Adapted to new cultural and linguistic environments while maintaining strict discipline.
- Learned Japanese and managed scheduling, records, and progress tracking using digital tools.
- Delivered lessons and presentations, improving communication, and cross-cultural collaboration.

Software Development Intern | DataLocker

Overland Park, Kansas

May 2021 - March 2023

- Developed automation scripts in Python to validate factory and password reset functions for hardware devices saving \$1,000,000 a year in outsourcing costs.
- Updated company webapp allowing more user customization through the use of JavaScript manipulation.
- Collaborated with 8 engineers across the world to troubleshoot and refine device reset procedures.

Projects

Before We Leave Item Randomizer

- Using the Archipelago public library, I designed a mod for the game Before We Leave that randomized all research and item unlocks to bring a unique experience every time you play.

Southeastern Idaho Hike Trail Website

- Taking from the Idaho Hike Trail API, I created a website that shows a selection of those trails and displays information about each trail and links to the trail's main website.

Gym Idea Generator Webapp

- With the help of a team, we designed an app that helps people who don't know what to do at a gym with ideas for workouts of different types and lengths. There is also a companion forum page to find people with similar skillsets.
